

DERMEDICS™ Calming algae peel-off beauty mask

Calming algae peel-off beauty mask is a marine alginate powder which transforms into a plastifying, cold mask when it is mixed with liquid solutions such as mineral water, MESO SERUMS and MESO GELS from DERMEDICS™.

After application the mask solidifies following the facial contours to provide fast and effective calming, moisturising and regenerating effects as the finishing stage of all types of professional treatments.

Overview

- Unisex: for women and men
- Recommended for all skin types: sensitive, normal, dry, oily, combination, mature
- Ideal for skin with broken capillaries, acne and eczema (to calm inflammations)
- Finishing mask: to reduce skin irritation post treatment (after microdermabrasion and/or peeling)
- Can be used also as conductive mask for procedures with iontophoresis [-] thanks to the presence of Vitamin C
- Recommended to be used also with phototherapy procedures

Effects

- Provides instant calming, nourishing and moisturising effect
- Accelerates regeneration and self-healing process of damaged skin
- Provides strong anti-oxidant defense
- Reduces redness and discoloration
- Restores brightening and even complexion (skin detox)
- Calms inflammation and supports in strengthening of blood vessels
- Visibly rejuvenates the skin and restores its younger appearance
- Stimulates collagen and elastin synthesis
- Restores lipid metabolism
- Re-mineralises and re-vitalises the skin
- Protects telomeres (thanks to Baicalin Extract)
(The telomere is a region of non-coding DNA located at the ends of chromosomes which is responsible for lifespan of skin cells).

How to use

OPTION 1 (recommended)

To increase anti-aging benefits you can apply directly on the skin MESO SERUM in ampoule or **MESO WHITE BOOSTER** from DERMEDICS™ before applying the algae peel-off beauty mask.

OPTION 2

Alginate powder can be treated as a base to create a unique beauty mask in a type which is individually needed for the patient.

To create individual beauty mask the alginate powder should be mixed with selected MESO SERUM and/or with MESO GELS from DERMEDICS™ as additional liquid ingredients to mineral water which is mandatory in mixing all together.

In both options: the consistence of the mask depends on the level of dosage of liquid ingredients which are added to the alginate powder and it can be adapted to individual expectations.

Minimum dose of liquid ingredients is 50-60 ml – maximum is 80-90 ml in total.

Active Ingredients

Marine Algae Powder + Baicalin Extract + Morus Nigra + Saxifraga Sarmientosa + Grape Fruit Extract ~ the source of anti-oxidants, anthocyanins and Resveratrol + Vitamin C
